IT solutions for fashion companies

Software

**Application Tool**

FEATURES

Fabric simulation

- Creating stripes and checks quite easily with user friendly dialogues
- Library with more than 300 standard fabric structures
- Free selection of color and width for the warp and weft
- Free selection of fabric structures
- Fast creation of your own fabric structures
- Simulation of your designs with fabric structures.

3D Simulation

- Create, load and save grids for 3D simulation
- Pattern filling and shadow allowance with 3D effects in true colour pictures.

Storyboards and catalogues

- Create storyboards and virtual prototypes for presentation of collections and customer presentations
- Integration to Microsoft Word for product sheets creation
- Common file formats enable the integration to other applications to compile catalogues.

PAINTER
Computer aided design software

With Painter you can create or modify garment styles and design your own stripes, checks, all-over prints and logos.

If you prefer to work with your design on paper or fabric, all you need to do is to scan your artwork into speed.

Painter will help you to reduce color, create, repeats and choose ways to quickly and easily apply color.

You can fill your styles with your fabric designs or logos.

Painter also has a very powerful 3D simulation function for "draping" your fabric design onto a figurine or even a photograph.

Use Painter tools to create your season catalogues and storyboards.

PAINTER
advanced software solutions

USE OUR SOLUTIONS FOR YOUR ADVANTAGE

✓ Pixel-oriented design software with special functions for textile and fashion design.

✓ User Friendly & easy user Interface.

✓ "Drag and drop" concept for moving and changing pictures.
