

YOUR NEW VIRTUAL  
FITTING SOLUTION

## YOUR NEW VIRTUAL FITTING SOLUTION

Reduce costs by saving fabric and other raw materials for prototyping.

Minimize logistic costs of shipping physical samples.

Lead time cut down.

Increase the number of creative proposals.

Curb costs for photo shooting.

Make your process more sustainable.

Enjoy 3Dress video

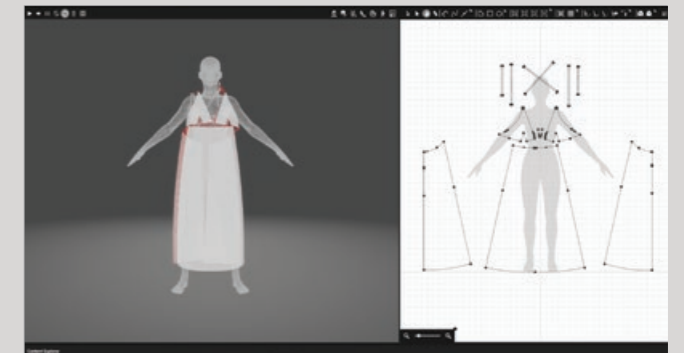

---

## 3Dress Editor

---

Create new styles using different preset libraries: block patterns, materials (fabrics). Fabric textures and prints, stitching and accessories.

You can achieve great results even without specific knowledge in pattern making.

Avatars can be customized for measurements as well as morphology. The fitting result is natural and realistic making it possible to manufacture less prototypes and invest more time in improving designing proposals.

Large selection of static poses and complex realistic animations

Fabric editor

Corrections and any changes to the pattern are displayed in real time on the side by side 3D window saving time, reducing the number of physical prototypes and costs.

Fabric thickness ensures realism and highlights clothing details.

Possible integration with PLM for sharing of BOM data and 3D image for technical spec sheet

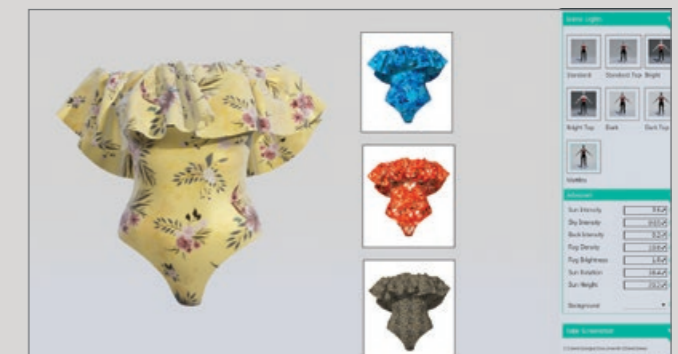

## 3Dress Viewer

A smart solution for the virtual presentation of garments designed in 3Dress.

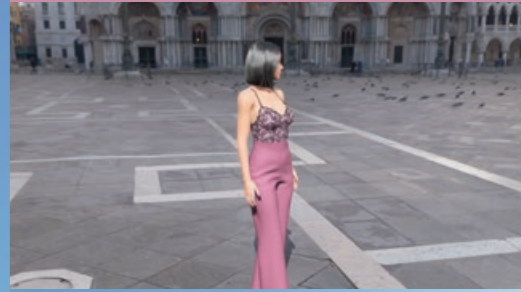

You can share your projects with your team and avoid shipment of physical samples. You can also use 3Dress Viewer for live presentations!

3Dress Viewer can be used on desktops and notebooks devices with no special hardware specifications nor particular technical skill required for the user.

Export of high resolution images

Panoramic scenarios

## 3Dress Shop

A great solution for fashion companies to quickly promote and sell their products on e-commerce to meet the increasing demand for customized products. Create an image gallery with all grading sizes for your 3D garment to publish on your e-commerce app or website.

## Virtual Sampling Accuracy

3Dress supports you to produce reliable virtual samplings that allow you to reduce costs and optimize time.

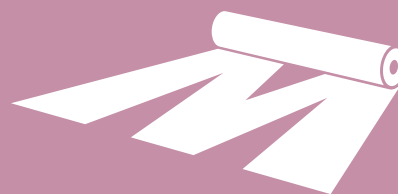

**ONSITE AND ONLINE TRAINING**  
Get your team trained by our CAD specialists and get the most out of 3Dress.

**ONLINE SUPPORT**  
Even after training we can support your team!  
Both training and online support are available in english, italian, spanish, chinese and german languages.
